Hi Gryphon.

I enjoyed meeting with you today and understanding your hopes for an app for walking and learning medieval history.

I am considering native app development as opposed to cross platform development.

I am considering using the language Swift for iOS development and Kotlin for Android Development.

My laptop and desktop both run Windows and Linux. I have an iPhone 16 Plus. I am considering developing for my iPhone. May I borrow a Mac laptop or desktop? Alternatively, may I borrow a cutting edge Android phone? Alternatively, we could buy a Mac mini.

Hi Chip.

I had a positive meeting with an entrepreneur with an interest in mobile app development and medieval history.

With some dark humor, is this nonprofit enough for me? I do like to solve problems. Really!

Hi Tom,

Me too! I'm delighted that you want to work on this project with me.

I only have a PC laptop. My husband (Ki) and daughter both have Macs, and I imagine either of them would be fine with you coming to use them at our place (home or office), but I don't think either would be up for having it leave with you. As to Android phones, Ki has an elderly Samsung which presumably won't do you any good. A Mac mini sounds great, but I truly have zero spare budget right now. We're saving every penny in the hopes of buying a house. Would using one Ki or Sappho's laptop at our place work for you? Probably the office would be better as our home internet is unreliable.

all the best,
Gryphon
